

4v4 (incomplete)

4v4 Δ summary

Demand CERTIFIED | C2 specialists FAIL

B3 crossover not sealed

No Share-* Delta yet

Do not fill until specialist PASS

6v6 (incomplete)

6v6 Delta summary

Demand CERTIFIED

No learned specialists

No Share-* Delta yet

Ladder not authorized yet

Central question: as team size and parameter sharing increase, where does Δ_A/Δ_B survive? Only sealed PASS specialist scales unlock Share-* rows. 2v2: Share-Encoder preserves the gate; Share-Macro fails via Δ_A .
